

Recommended Reading for "Going Bananas"

	<p>Great Graph Contest by Loreen Leedy</p> <p>Primary. "Leedy makes graphing simple and fun in this delightfully clever outing...Highly educational and fun to boot." --Kirkus Reviews</p>
	<p>Tally Cat Keeps Track by Trudy Harris</p> <p>Primary. "Math and a lesson in friendship rolled into one." --Kirkus</p>
	<p>Lemonade for Sale by Stuart Murphy</p> <p>Primary. "A winning way to make some basic concepts and techniques less intimidating." --Kirkus</p>
	<p>Tiger Math: Learning to Graph from a Baby Tiger by Ann Whitehead Nagda</p> <p>Middle Grade. "Nagda has paved an inviting path to graph interpretation, and a story even the math-reluctant will follow." —<i>Bulletin of Center of Books for Children</i></p> <p>* Outstanding Science Children's Book 2001 -- Nat'l Science Teachers Assoc.</p>
	<p>How Many Guinea Pigs Can Fit on a Plane? by Laura Overdeck.</p> <p>Middle Grade. "Combining questions from real readers like you with surprising answers, Overdeck's book proves that numbers can be fun—and that math is power. Proof that word problems can be fun." —<i>School Library Journal</i></p>
	<p>Sir Cumference and the Off-the-Charts Dessert by Cindy Neuschwander</p> <p>Intermediate. "This humorous story offers one explanation for the origin of pie charts and bar graphs while serving up some possible mathematical or culinary career choices for youngsters. Math has never been so sweet." --<i>Reading Today Online, IRA</i></p>
