Antarctica, Antarctic-o!

by Heidi Bee Roemer

Antarctica, Antarctic-o!

It's a place where *blizzards* blow.

A *continent* of ice and *snow*

where *penguins* float on frosty floes,

but humans rarely dare to go.

Antarctica, Antarctic-o!

where *whales* swim in seas below

and *seabirds* migrate to and fro.

Seals live there even though

the *temperature*'s sixty below.

Antarctica, Antarctic-o!

It's the coldest place I know.

Instead of trees, great *glaciers* grow.

So if you dare to visit there--

bring lots of flannel underwear!
