

Circle and Square:

A Poem for Two Voices

by Heidi Bee Roemer

Hi! I'm a flat shape.

I'm a shape, too!
Why do I look so different from you?

My lines are curvy.

My lines are straight.

It seems we have nothing in common.

BUT WAIT!

We're from the very same family tree;

The branch of mathematics called

GEOMETRY!

We're both "plane" and flat.

WHICH MEANS WE'RE 2-D!

Okay! We're related.

Kind of like cousins.

Are there more shapes like us?

PROBABLY DOZENS!

Let's see how we differ.

And how we're the same.

Let's find other shapes--

AND LEARN ALL THEIR NAMES!
