

Gadgets and Gears

by Heidi Bee Roemer

What are *gears*?

They're *wheels* with *teeth*.

They're used in many ways.

Gears *rotate* inside gadgets
that folks use every day.

Gears move the hands of wind-up clocks.

They make your bike wheels spin.

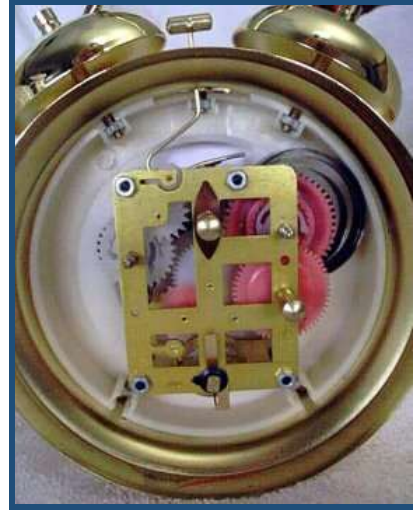

Gears turn the fan and open cans
and shave a scruffy chin!

Gears sharpen wooden pencils.

They whip the whipping cream.

Gears perform all sorts of chores--

They're work-saving *machines*!
