

Spots and Dots

by Heidi Bee Roemer

Leopards have a lot of spots.

But zebras don't have any.

Ladybugs have spots and dots.

Dalmatian dogs have many.

Fawns have fur with spots galore.

Flickers have spots, too.

Giraffes have spots of larger size.

You might “spot” them at the zoo!

Freckles are a kind of dot.

They're sprinkled on my nose.

Call them freckles, dots or spots—

I've lots and lots of those!

Northern Flicker
